

CONFLICT MINERALS POLICY STATEMENT

On August 22, 2012, the U.S. Securities and Exchange Commission (“SEC”) published regulations implementing Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Conflict Minerals Rule”). The term “conflict minerals” refers to specific minerals originating from mines controlled by armed groups in the Democratic Republic of the Congo and adjoining countries. The minerals are:

- Tin (cassiterite)
- Tungsten (wolframite)
- Tantalum (columbite-tantalite or coltan)
- Gold

EndRun Technologies supports the Conflict Minerals Rule and has verified that materials sourced directly or indirectly through our suppliers meet the requirements. We will assist and strive to work cooperatively with our customers in implementing their conflict minerals compliance programs.
